

Battery Mounting Bracket

The Varley Red Top Battery Bracket combines strong and lightweight aluminium with polyethylene foam padding to protect your battery from damage caused by excessive shock and vibrations. Available in four different sizes to suit the popular Varley Red Top 15, 25, 30 and 40 batteries, the brackets offer a weight efficient, robust solution to securing and protecting a battery for racing.

Features

- Constructed from grade 5251 aluminium (good strength and high corrosion resistance)
- 10mm closed cell polyethylene foam padding lining the bracket
- Slotted fixing points for easier fitting in tight spaces
- Fixing holes/slots to suit M6 fastenings, to the sides and base
- Lightweight, from 1.2kg (RT15/RT25) to 1.3kg (RT30/RT40)

Benefits

- Protects the battery from shock and vibration coming from the engine, gearbox and track/road surface
- Strong yet weight-efficient solution for securing a battery in a race car
- Designed to fit restricted spaces without compromising a secure mount
- A matched, purpose-built option for each corresponding Red Top battery size
